

FIVE RIGHTS CDS FRAMEWORK FROM ONC:

1. the right information (evidence-based guidance, response to clinical need),
2. to the right people (entire care team – including the patient),
3. through the right channels (e.g., EHR, mobile device, patient portal),
4. in the right intervention formats (e.g., order sets, flow-sheets, dashboards, patient lists),
5. at the right points in the workflow (for decision making or action).

CLINICAL DECISION SUPPORT SHOULD ENCOMPASS BUT NOT BE LIMITED TO:

1. computerized alerts and reminders for providers and patients;
2. clinical guidelines;
3. condition-specific order sets;
4. focused patient data reports and summaries;
5. documentation templates;
6. diagnostic support;
7. contextually relevant reference information.
